

ONLINE VOTING SYSTEM A ASP.NET PROJECT(.NET)-2012(FINAL PROJECTS 2030)

Introduction:

The project "Online voting system a ASP.Net Project" aims at creating a system through which the voting process is made easier in cooperative societies. In the current system, voting is performed by using ballot paper and then the counting is executed manually. This is a time consuming process and involves manual effort. It might also lead to the possibility of invalid votes.

All the above tedious tasks are eliminated in the above process. In the system discussed here, the counting of votes is done by using a computer. This saves time and also avoids the errors that might occur during the election process. The system is designed with the coding language ASP.Net with C# and the database is SQL Server 2005.

ASP.Net online Voting Project description:

The project Online Voting system is designed to count the number of votes and thereby calculate the percentage of votes. Also the number of vote a candidate obtains is also obtained. Along with the number the percentage of votes for each candidate is calculated. The system is so designed that it can also check for duplication. It then decides the winner in every section.

The project is designed with a modular approach and the number of modules is decided as per the requirements of the organization. The two modules are administrator module and the user module. The administrator has total authority of the organization and maintains all the aspects. The user has the provision to view the list of all candidates and results as well as vote for the desired candidates.

using System;

using System.Data;

using System.Configuration;

using System.Collections;

using System.Web;

using System.Web.Security;

using System.Web.UI;

using System.Web.UI.WebControls;

```

using System.Web.UI.WebControls.WebParts;

using System.Web.UI.HtmlControls;

using System.Data.SqlClient;

using System.Windows.Forms;

public partial class JobSeeker_Viewalljobs : System.Web.UI.Page

{

SqlConnection con;

SqlDataAdapter da;

DataSet ds;

protected void Page_Load(object sender, EventArgs e)

{

con = new SqlConnection(ConfigurationManager.ConnectionStrings["crms"].ConnectionString);

da = new SqlDataAdapter("select * from Job_Details", con);

con.Open();

ds = new DataSet();

da.Fill(ds, "Jobs");

GridView1.DataSource = ds.Tables[0];

GridView1.DataBind();

}

}

```

Conclusion:

Once the system is designed the software is tested in order to see the validity of the system is established. This is the method by which functionality of components is checked. After the system is tested then a trial run of the system is done so that errors if any can be eliminated.

ONLINE TICKET BOOKING SYSTEM FOR PVR CINEMAS(NET)-2012(FINAL PROJECTS 2030)

Introduction:

The main objective of this project “Online ticket booking system for PVR cinemas” is to book tickets online. It provides an alternate and convenient method for a customer to purchase tickets. The system is automatic in nature. Once the data is fed into the database, the staff need not do anything and the entire order is processed by the system. This project also offers the option of refund to the customers.

This system allows the customers to book tickets from anywhere. The number of staff members is also minimized at the ticket box. The film could also be promoted on the internet. This could bring in more profit for the theatres. The statistical records about the booking process are also provided.

Description:

The project Online ticket booking system for PVR cinemas is a web based system which allows the customers to purchase tickets online and also allows the cancellation of a ticket at an appropriate time i.e. decide by the theatre. To enhance the refund system, the customers have to be a valid member of the site and complete the registration process. The staff can add and delete data to make the system dynamic and interesting for viewers.

The web page is generated by an automatic process based on the data in the database. There are provisions in the site for a user to become a registered member. Through a simple operation the customer can select the seat and make the payment. He can also cancel the booking through a simple mechanism.

Conclusion:

The project is a real time based management system. This can be practically implemented. The mode of payment can be modernized and various enhancements could be done to this process. The customer has the choice of choosing the seat he is comfortable with. Also the pricing could be made dynamic in order to enhance the system.

SAIKOSOUND A ONLINE WEBSITE PROJECT USING .NET(.NET)-2012(FINAL PROJECTS 2030)

Computer science final year students who are looking for developing online shopping website using .Net as software tool then SAIKOSOUND a Online website project using .Net can be helpful. This projects main idea is to introduce E-shopping facility for a well known Saikosound shopping spot located at Hong Kong. This project will provide online services for users who are looking to shop through online by providing security features in a most efficient way. This application mainly concentrates on consistency, integrity and privacy for every user who what to perform transactions through this website.

As the website is designed with high standards with features like selection of the product, User login, online order request, Catalog view and customer support. Initially user must log in to the website and use the above mentioned features for selecting products available in the catalog. Based on the selected product price is calculated and then user can pay amount using different online methods like PayPal, credit card..Etc.

Saikosound a Online website project using .Net application is developed in the way that it can be easily modified for future improvements, if required, integrating and implementing will be very easy. This project will definitely reduce man power and increase sales without any risk for user.

LIST OF FINAL YEAR PROJECT IN C#.NET(FINAL PROJECTS 2030)

Here you can download complete project listing with source code, project report, database structure of live project. If you are a final year college student of Diploma Engineering, BSC-IT, BE, BCA, MCA, MS, MBA from Indira Gandhi National Open University - IGNOU (Distance Education, Learning), Sikkim Manipal University - SMU of India and International Universities and looking for complete software project source code, abstract, synopsis and documentation, here you can download readymade project for submission. You can also download this source code as mini, major project for submit as a final semester project.

Download **IGNOU**, **SMU** Sample, Template, Last Year, Previous Year, Final Year / Semester project files for **MCA** (Master of Computer Application), **BCA** (Bachelor of Computer Application), **BSc.** (Bachelor of Science), **BE** (Bachelor of Engineer), **BTech** (Bachelor of Technologies), **BSC-CS** (Bachelor of Computer Science), **BSC-IT** (Bachelor of Science in Information Technology), **DIT** (Diploma In Information Technology), **BCom IS** (Bachelor of Commerce in Information System), PGDCA (Post Graduate Diploma in Computer Application), **MSc. CS** (Master of Science in Computer Science), **MCom IS** (Master of Commerce in Information System), **MBA IT** (Master of Business Administration Information Technology), **BIT**, **ADIT**, **ME**, **MTech**, **MBA IT/System**, **Diploma**, **Polytechnic Engineering** , **Computer Science** college student of Indian university.

Click here to get more than 500 unique academic [project idea](#) in different programming languages. Download this project concept, abstract, SRS, source code to complete project for IGNOU, SMU, DOEACC University and college submission.

[Project # 1 eBilling and Invoice System](#)

Computerization of Billing and Invoice system, Download project documentation, project source code, project executable files.

Type : **Desktop / Client Server**

Technology : **Visual Basic, MS ACCESS**

Credit : Mr. Atanu Maity

[Project # 2 IMPRO \(Industrial Manpower Resource Organizer\)](#)

This project is developed for Industrial Manpower Resource Organizer for managing Employees, branches, planning, controlling and executing HR policies, HR Automation software and Reports.

Type : **Desktop / Client Server**

Technology : **VB.NET, SQL Server**

Credit : Mr. Joydeep Dass

[Project # 3 Online Registration \(Online Student Registration System\)](#)

Online Registration System is an web based application for on line submission of application forms, On-line Quizzes for the first semester courses, online results will display after completing the test. Inbuilt login security system for Authentication.

Type : **Web Application**

Technology : **ASP (Active Server Page), Java Script, MS Access**

Credit : [AJProfessionals](#)

[Project # 4 WCPS \(Web Based Claims Processing System\)](#)

Web Based Claims Processing System (WCPS) which is web based so that the employee can fill the form online and submit it so that the form is sent to Claim Processing Department (CPD) through Internet. At CPD, the form needs to be checked automatically by a program which will compute the amount that needs to be reimbursed to the employee for the treatment undertaken.

Type : **Web Application**

Technology : **ASP.Net, C#, SQL Server**

Credit : [AJProfessionals](#)

[Project # 5 eProperty \(Estate Agent / Property Management System\)](#)

eProperty - is an Estate Agent and Property Management System is a user friendly contact and property manager for real estate professionals. Save time and sell more by empowering to easily keep track of leads, manage listings, and market to new prospects.

Type : **Desktop / Client Server**

Technology : **VB6, SQL Server, Crystal Report**

Credit : [Readymadeproject](#)

[Project # 6 Steganography \(Technique to hide information within image file\)](#)

Steganography is the art of hiding the fact that communication is taking place, by hiding information in other information. This project is developed for hiding information in any image file. The scope of the project is implementation of steganography tools for hiding information includes any type of information file and image files and the path where the user wants to save Image and extruded file.

Type : **Desktop / Client Server**

Technology : **C#, .Net Framework 3.5**

Credit: Mr. Atanu Maity

Project 1 : eBilling, Accounting and Invoice System

eBilling and Invoice System is a live project written in Visual Basic 6 programming language. It is a working solution. I give you complete project listing with all project file, source code, database, crystal reports. You can use this project as you want. I am not claim any copyright for this project. You can free download all the project documentation, project source code, project executable files, database from [download](#) link and submit as SMU, IGNOU project. Code are well commented for your reference, however if you want any clarification you can contact me for further explanation.

Who can use this project ?

1. Commercial visual basic application developer can use this project as a whole or part of it as required.
2. Student who are submitting their final year project for BE, BCA, BSC-IT, MCA, MS, SMU, IGNOU this project is well commented, ready made project documentation available for submission.
3. Who want to learn database programming in visual basic.
4. Who want to know how to develop commercial application from project requirement to implementation and final documentation.
5. To learn Billing, Invoicing and Accounting project development and Win API Programming in visual basic.
6. How to create report in Crystal Report and integrate with visual basic application.

Project Description

This project is made for one of the big decorator services in Mumbai, they supply decorating item to film industry for movie shooting. Presently they issue their client handwritten invoice and they enter details in manual register. And maintain MS Excel file for product rate. They want computerization of their manual invoice and bill generation process.

Some important coding features you can get from this project.

1. How to convert MSFlexGrid as editable text box and drop down list box.
2. How to format MS-Excel worksheet with border color, back ground color, text color and change column width in visual basic.
3. Convert Rupees to amount in word like 123.50 will convert into "Rupees one hundred twenty three and fifty paise only"
4. How to connect and show crystal report from visual basic application.

Click here to [Download](#) the project documentation, source code, database and report files for eBilling Invoicing and Accounting System.

For any query and help regarding this project visit

http://www.programmer2programmer.net/forums/forum_main.aspx?forum_id=6

Click here to view the [online demo](#) of the eBilling application.

Please send me your college project report format and project guide line at [my email id](#) , so that I can prepare and list projects and project report as per your college/university standard.

All projects listed here can be used for bellow mentioned Indian university. Find the list of Universities.

LIVE PROJECT - 3. ONLINE STUDENT REGISTRATION SYSTEM(FINAL PROJECTS 2030)

The Online Student Registration System is an web based portal developed in ASP. Online Registration system will allow online submission of student application, Student Registration, Perform Computer based quiz/test. Stored test results, modify student profile. Online Student Registration System Project consists of two functional elements: an enhanced Student module for Registration, Edit Profile, View Test history, Change Password. Online Test/Quiz Module for Start test, give examination, calculate results, store test results, manage question banks. You can free download all the project documentation, project source code, active server page (*.asp) files, Java Script (.js) files, cascading style sheet (.css) CSS files, Image and Layout files, database, Installation Guide from [download](#) link. Code are well commented for your reference, however if you want any clarification you can contact me for further explanation, click here to view online [demo](#) of this application.

Click here to get more than 500 unique academic [project idea](#) in different programming languages. Download this project concept, abstract, SRS, source code to complete project for your college submission.

Who can use this project ?

- Submission of semester and final year college student for academic purpose.
- Student who are submitting their mini, major project for BE, BCA, BSC-IT, BIT, MBA, MCA, MS, this project is well commented, ready made project documentation available for submission.
- Who want to learn asp and database programming in visual basic script.
- Student of Mumbai, Delhi, Calcutta, Chennai, Pune, Bangalore University of India and other international university.
- IGNOU, SMU, DOEACC student.
- How to develop web projects by using ASP, Java Script.
- How to host web application in IIS - Internet Information Server.

Abstract Currently student submits hardcopy of filled application form to the college/university, office staff enters all data into excel file and write same in manual register. Issue hall ticket / admit card to student and conduct test for student. Student comes to college and give test for the specified date. Office staff check all the paper calculate results and type all the details for taking printout and display it in college premises. College inform student to check the result, student comes to college and view the results. Proposed online student registration system will eliminate all the manual intervention and increase the speed of whole process. System will allow student to fill the form online, system has inbuilt validation system to validate the entered data. After successful submission, system will give unique registration no for each student. Student can login into system by using registration no and give online test. System will show the result after instantly and stored the results for further use. **Project Requirement**

- On line submission of application forms.
- On-line Quizzes for the first semester courses. There should be minimum 50 questions (objective types with four options)
- When user leaves the test its result should be displayed at that moment.
- There should be a proper login system for the user where security is required.
- The web technologies to be used ; DHTML, CSS, JavaScript and ASP
- The proper validation should be done.

Solution After analysis the requirement we decide that we need to create following web pages

- Home Page
- Login Page
- My Page
- Registration
- Change Password
- Edit Profile
- Start Test
- Examination
- Results
- FAQ
- Contact Us

Deployment Environment

- **Database Server** OS – Win 2003 Enterprise Server MS Access HDD – Min 10 GB, Recommended 25 GB RAM – Min 1 GB, Recommended 2 GB Processor – Pentium Dual Xenon Processor
- **Application Server** OS – Win 2003 Enterprise Server IIS – Internet Information Server HDD – Min 5 GB, Recommended 10 GB RAM – Min 1 GB, Recommended 2 GB Processor – Pentium Dual Xenon Processor
- **Workstation:** The online registration system web application will operate with the following Web Browsers: Microsoft Internet Explorer version 5.0, 6.0, 7.0.

Development Tools and Technologies

- **ASP** (Active Server Pages) -Inbuilt with IIS 4.0 onward -No need of compilation and any special software package.
- **MS Access** -Easy to use and easy to deployment -ADO compatibility especially with ASP scripting.

Download the project documentation, source code, database and report files.

Download Type	Download File	Size in KB	No of times download
1. Project Synopsis	 or_synopsis.doc	9	19936

FINAL YEAR PROJECT IN JAVA, DOT NET, PHP AND FINAL YEAR PROJECT FOR 2011 IN CHENNAI(FINAL PROJECTS 2030)

Softlogic Solutions, training division of Softlogic Group Of Company India Pvt Ltd, located in Chennai, providing academic curriculum to the needs of IT industry. It is now extended to the career-oriented aspirants to provide them with specialized software guidance in Dot net, Java/J2ee, PHP/ MYSQL/ LAMP/PHYTHON and to give exposure to the IT industry and real time final year projects. 4S Software SolutionS has come forward to offer academic final year projects for students having knowledge on computer applications. We provide complete assistance for working on real time final year projects in Dotnet, Java/J2ee,PHP/MYSQL/LAMP/PHYTHON technologies.

Are you looking for real time project in an it company with realtime exposure from it developers. We are providing the project assistance training to the candidate with our development environment. We are concentrating on the below technology like,

1. Dot NET
2. JAVA and J2EE
3. PHP, MYSQL WITH JOOMLA
4. SOFTWARE TESTING
5. NS2
6. IEEE
7. EMBEDDED

KINDLY NOTE:

Even students without this technical knowledge would be offered a training with real time projects
TRAINING SERVICES:

1. DOT NET 2008 WITH ADVANCED CONCEPTS LIKE ATLAS, AJAX, LINQ, WPF, WCF AND ETC.
2. JAVA, J2EE WITH AJAX, HIBERNATE, SPRINGS
3. PHP, MYSQL WITH JOOMLA
4. SOFTWARE TESTING WITH ADVANCED CONCEPTS OF DESCRIPTIVE PROGRAMMING.

Apart from that we are providing placement oriented programs like personality development and communication skills. Once you complete the training program, you are eligible for placements too.
WE PROVIDE INTERNATIONAL CERTIFICATIONS LIKE

1. Microsoft for .Net
2. Sun Microsystem for JAVA, J2EE
3. Zend for PHP
4. ISTQB for software testing

IF YOU WANT TO BUILD YOUR CAREER IN IT INDUSTRY..

WALK IN TO Softlogic International BPO SolutionS,

For All Diploma, M.B.A, B.B.A, B.E, M.E, B.C.A, M.C.A, B.Sc (Electronics), B.Sc (Computer Science), B.Sc(All Departments)

MINI PROJECT KITS, HOBBY PROJECT KITS ARE ALSO SALE HERE

offers final year projects for B.E Students of following department With best rate

final year projects for B.E. Computer Science and Engineering

final year projects for B.E. Electrical & Electronics Engineering

final year projects for B.E. Mechanical Engineering

final year projects for B.E. Electronics and Communication Engineering

final year projects for B.E. Electronics and Instrumentation Engineering

final year projects for B.E. Production Engineering

final year projects for B.Tech. Information Technology

offers final year projects for M.E & M.Tech Students

offers IEEE Based Projects

EMBEDDED MICROCONTROLLER PROJECTS

VLSI- PROJECTS

RFID PROJECTS

ROBOTIC PROJECTS

COMMUNICATION SYSTEM

WEB BASED APPLICATION ON PHP, ASP.NET, JSP FINAL YEAR PROJECTS(FINAL PROJECTS 2030)

S. No.	Title	Tools
1	Online Testing Solution	ASP.Net/PHP
2	Online Job Portal	ASP.Net/PHP
3	Cargo Shipping Management	ASP.Net/PHP
4	Human Resource Management	ASP.Net/PHP
5	Call Center Management System	ASP.Net/PHP
6	Online Financial Information & Security	ASP.Net/PHP
7	Online Examination System	ASP.Net/PHP
8	Online Customer Service	ASP.Net/PHP
9	Net Banking	ASP.Net/PHP
10	Online Auctioning	ASP.Net/PHP
11	Jewellery Shop Maintenance	ASP.Net/PHP
12	Electronic Fund Transfer (EFT)	ASP.Net/PHP
13	Online Book Shop	ASP.Net/PHP

NET IEEE-2011 PROJECT'S(FINAL PROJECTS 2030)

1.Predicting Missing Items in Shopping Carts.

2.A Gen2-Based RFID Authentication Protocol for Security and Privacy.

3 .A Tabu Search Algorithm for Cluster Building in Wireless Sensor Networks.

4 .Biased Random Walks in Uniform Wireless Networks.

5 .Cell Breathing Techniques for Load Balancing in Wireless LANs.

6 .Energy Maps for Mobile Wireless Networks: Coherence Time versus Spreading Period

7 .Greedy Routing with Anti-Void Traversal for Wireless Sensor Networks.

- 8 .RandomCast: An Energy-Efficient Communication Scheme for Mobile Ad Hoc Networks.**
- 9 .Resource Allocation in OFDMA Wireless Communications Systems Supporting Multimedia Services**
- 10 .Route Stability in MANETs under the Random Direction Mobility Model.**
- 11 .Secure and Policy-Compliant Source Routing.**
- 12 .Information Content-Based Sensor Selection and Transmission Power Adjustment for Collaborative Target Tracking.**
- 13.On the Planning of Wireless Sensor Networks: Energy-Efficient Clustering under the Joint Routing and Coverage Constraint.**
- 14.Enforcing Minimum-Cost Multicast Routing against Selfish Information Flows.**
- 15 .Movement-Assisted Connectivity Restoration in Wireless Sensor and Actor Networks.**
- 16 .Cell Breathing Techniques for Load Balancing in Wireless LANs.**
- 17 .Explicit Load Balancing Technique forNGEO Satellite IP Networks With On-Board Processing Capabilities.**
- 18 .Two Blocking Algorithms on Adaptive Binary Splitting: Single and Pair Resolutions for RFID Tag Identification.**
- 19 .Resource Allocation in OFDMA Wireless Communications Systems Supporting Multimedia Services.**
- 20 .Analysis of Shortest Path Routing for Large Multi-Hop Wireless Networks.**
- 21 .Resequencing Analysis of Stop-and-Wait ARQ for Parallel Multichannel Communications.**
- 22 .Secure and Policy-Compliant Source Routing.**
- 23 .Biased Random Walks in Uniform Wireless Networks.**
- 24 .Energy Maps for Mobile Wireless Networks: Coherence Time versus Spreading Period.**
- 25 .A Tabu Search Algorithm for Cluster Building in Wireless Sensor Networks.**
- 26 .An Integrated Approach to Sensor Role Selection.**

27 .Information Content-Based Sensor Selection and Transmission Power Adjustment for Collaborative Target Tracking.

28 .On the Planning of Wireless Sensor Networks: Energy-Efficient Clustering under the Joint Routing and Coverage Constraint.

29.Resequencing Analysis of Stop-and-Wait ARQ for Parallel Multichannel Communications.30.Greedy Routing with Anti-Void Traversal for Wireless Sensor Networks.

31.A Gen2-Based RFID Authentication Protocol for Security and Privacy.

32.RandomCast: An Energy-Efficient Communication Scheme for Mobile Ad Hoc Networks.

33.Dynamics of Multiple-Seller and Multiple-Buyer Spectrum Trading in Cognitive Radio Networks.34.On the Security of Route Discovery in MANETs.35.Route Stability in MANETs under the Random Direction Mobility Model.

36.A Gen2-Based RFID Authentication Protocol for Security and Privacy .

37 .A Tabu Search Algorithm for Cluster Building in Wireless Sensor Networks.

38 .Analysis of Shortest Path Routing for Large Multi-Hop Wireless Networks.

39 .Biased Random Walks in Uniform Wireless Networks.

40 .Energy Maps for Mobile Wireless Networks: Coherence Time versus Spreading Period.

41 .Explicit Load Balancing Technique for NGE0 Satellite IP Networks with On-Board Processing Capabilities.

42 .Greedy Routing with Anti-Void Traversal for Wireless Sensor Networks.

43 .Information Content-Based Sensor Selection and Transmission Power Adjustment for Collaborative Target Tracking.

44 .On the Planning of Wireless Sensor Networks: Energy-Efficient Clustering under the Joint Routing and Coverage Constraint.

45 .Resequencing Analysis of Stop-and-Wait ARQ for Parallel Multichannel Communications.

46 .Resource Allocation in OFDMA Wireless Communications Systems Supporting Multimedia Services.

47 .Route Stability in MANETs under the Random Direction Mobility Model .

48.Secure and Policy-Compliant Source Routing.

49 .Single-Link Failure Detection in All-Optical Networks Using Monitoring Cycles and Paths.

50 .Two Blocking Algorithms on Adaptive Binary Splitting: Single and Pair Resolutions for RFID Tag Identification.

ASP.NET PROJECTS LIST(FINAL PROJECTS 2030)

1. Image steganography (Java 1.5).
2. Root Locus Simulator (Visual Basic6.0).
3. Bode Plot Simulator (Visual Basic6.0).
4. Herwitz Determinant Simulator (Visual Basic6.0).
5. RH Criteria Simulator (Visual Basic6.0).
6. Facial Image Compresion (Visual Basic 6.0).
7. Courler Information System (Visual Basic 6.0 MS Access).
8. Online Mailing Application (VB.Net/ASP.NET MS Access 2000 /PLSQL)
9. CRM Solution (Java/Asp .NET Sql Server2000)
10. Health Information System (ASP .Net/Sl Server2000).
11. Blood Bank management System (VB6.0/VB .Net MS Accesss2000).
12. Finger Print Scanning :: Banking Application (VB .Net/VB Sql Server2000/MS Access2000).
13. Finger Print Scanning :: ATM Finger Print (ASP .Net Sql Server2000).
14. Lab Attendance Student using Finger Print Scanner.
(VB/VB.Net/ASP.Net MSAccess/ SqlServer2k).
15. Data Search Optimization (VB,Net/Asp.NetSql Server2000/ Oracle 10g).
16. Salary information System (VB/VB.Net/Asp.Net SQL Server2000).
17. Fruit Information System (VB MS Access).
18. Cyborg (HTML/FLASH MX / JAVASCRIPT).
19. Tourism Information (ASP.NET Sql Server 2000).
20. Sports Information (ASP.Net MS Sql Server WML).
21. Dyanamic Information System (C#.Net.Net Framework, Html, Java Script).
22. Student Smart Card Application (VC++, MS-Access)
23. Student Information Systems.(VB, C#.Net).
24. Online Shopping (ASP MS Sql Server).

25. Online Banking System. (C# +ASP).
26. Finger Print Scanning Of Criminals (VB,MS Access).
27. Animation Engineering (Flash MX,ASP).
28. Banking S/W accessing with Help Of Biometrics Technology (VB Net And Access H/W:- Finger print Scanner.)
29. CRM relationship manegment (VB.Net And Oracle).
30. E-Insurance (java)
31. H/W Troubleshooter and its Solution.(VC#.Net/VB and MS -Access)
32. Health Care System Connecting at Various terminals to get the information (ASP/ASP.NET,SQL Server2000)
33. Banking Softwaer to Access the information at varrious levels with Complete Security (ASP.Netr, SQL Server2000)
34. Telephonic Resulting System (VC++,VB)
35. Complete ecommerce solution For a Web based store with Searching,Shopping,Payment,Order Processing etc.(ASP/ASP.NET SQL Server2000).
36. Alumri club for your colloge real Hosting and usage (VE.Net, Java Script/JAVA, SQL Server2000)
37. Majer Level of Crime to be minimized by Desplying the records Online and read the record at every level with updating from admin level only (VB/VB.NET, SQL Server2000)
38. e-SCM: Supply Chain Management Saolution For a distribution company (ASP/ASP.NET,SQL Server2000)
39. Helep Desk and Fund raising system at the time of emergency like floods earthquakes. (VB/VB.Net, SQL Server2000)Wireless accessing the WAP site (WML, GPRS hadset,simulator)
40. Finger Corporate Authentication system with Photo identefication (VB.NET + MS Access).
41. News Portal System (ASP.NET + SQL: Server)
42. Bank Account Access System (Java + VB.Net + Access)
43. Criminial Identification System. (MATLAB + VB + Access).
44. Interactive Classroom for College (VB.NET + SQL 2k)
45. Digital Parking System (VB.NET + Access)
46. Univercity Admission System (VB.NET + Access)
47. Message converssion tool (ASP.NET + SQL2k)
48. Job Recrument Scheme (ASP.NET + Access)
49. CD Return System (VB.NET + Access).
50. Sending mail using VB.

LIST OF FINAL YEAR PROJECT IN C#.NET(FINAL PROJECTS 2030)

Here you can download complete project listing with source code, project report, database structure

of live project. If you are a final year college student of Diploma Engineering, BSC-IT, BE, BCA, MCA, MS, MBA from Indira Gandhi National Open University - IGNOU (Distance Education, Learning), Sikkim Manipal University - SMU of India and International Universities and looking for complete software project source code, abstract, synopsis and documentation, here you can download readymade project for submission. You can also download this source code as mini, major project for submit as a final semester project.

Download **IGNOU**, **SMU** Sample, Template, Last Year, Previous Year, Final Year / Semester project files for **MCA** (Master of Computer Application), **BCA** (Bachelor of Computer Application), **BSc.** (Bachelor of Science), **BE** (Bachelor of Engineer), **BTech** (Bachelor of Technologies), **BSC-CS** (Bachelor of Computer Science), **BSC-IT** (Bachelor of Science in Information Technology), **DIT** (Diploma In Information Technology), **BCom IS** (Bachelor of Commerce in Information System), PGDCA (Post Graduate Diploma in Computer Application), **MSc. CS** (Master of Science in Computer Science), **MCom IS** (Master of Commerce in Information System), **MBA IT** (Master of Business Administration Information Technology), **BIT**, **ADIT**, **ME**, **MTech**, **MBA IT/System**, **Diploma**, **Polytechnic Engineering** , **Computer Science** college student of Indian university.

Click here to get more than 500 unique academic [project idea](#) in different programming languages. Download this project concept, abstract, SRS, source code to complete project for IGNOU, SMU, DOEACC University and college submission.

[Project # 1 eBilling and Invoice System](#)

Computerization of Billing and Invoice system, Download project documentation, project source code, project executable files.

Type : **Desktop / Client Server**

Technology : **Visual Basic, MS ACCESS**

Credit : Mr. Atanu Maity

[Project # 2 IMPRO \(Industrial Manpower Resource Organizer\)](#)

This project is developed for Industrial Manpower Resource Organizer for managing Employees, branches, planning, controlling and executing HR policies, HR Automation software and Reports.

Type : **Desktop / Client Server**

Technology : **VB.NET, SQL Server**

Credit : Mr. Joydeep Dass

[Project # 3 Online Registration \(Online Student Registration System\)](#)

Online Registration System is an web based application for on line submission of application forms, On-line Quizzes for the first semester courses, online results will display after completing the test. Inbuilt login security system for Authentication.

Type : **Web Application**

Technology : **ASP (Active Server Page), Java Script, MS Access**

Credit : [AJProfessionals](#)

[Project # 4 WCPS \(Web Based Claims Processing System\)](#)

Web Based Claims Processing System (WCPS) which is web based so that the employee can fill the form online and submit it so that the form is sent to Claim Processing Department (CPD) through Internet. At CPD, the form needs to be checked automatically by a program which will compute the amount that needs to be reimbursed to the employee for the treatment undertaken.

Type : **Web Application**

Technology : **ASP.Net, C#, SQL Server**

Credit : [AJProfessionals](#)

[Project # 5 eProperty \(Estate Agent / Property Management System\)](#)

eProperty - is an Estate Agent and Property Management System is a user friendly contact and property manager for real estate professionals. Save time and sell more by empowering to easily keep track of leads, manage listings, and market to new prospects.

Type : **Desktop / Client Server**

Technology : **VB6, SQL Server, Crystal Report**

Credit : [Readymadeproject](#)

[Project # 6 Steganography \(Technique to hide information within image file\)](#)

Steganography is the art of hiding the fact that communication is taking place, by hiding information in other information. This project is developed for hiding information in any image file. The scope of the project is implementation of steganography tools for hiding information includes any type of information file and image files and the path where the user wants to save Image and extruded file.

Type : **Desktop / Client Server**

Technology : **C#, .Net Framework 3.5**

Credit: Mr. Atanu Maity

Project 1 : eBilling, Accounting and Invoice System

eBilling and Invoice System is a live project written in Visual Basic 6 programming language. It is a working solution. I give you complete project listing with all project file, source code, database, crystal reports. You can use this project as you want. I am not claim any copyright for this project. You can free download all the project documentation, project source code, project executable files, database from [download](#) link and submit as SMU, IGNOU project. Code are well commented for your reference, however if you want any clarification you can contact me for further explanation.

Who can use this project ?

1. Commercial visual basic application developer can use this project as a whole or part of it as required.
2. Student who are submitting their final year project for BE, BCA, BSC-IT, MCA, MS, SMU, IGNOU this project is well commented, ready made project documentation available for submission.
3. Who want to learn database programming in visual basic.
4. Who want to know how to develop commercial application from project requirement to implementation and final documentation.
5. To learn Billing, Invoicing and Accounting project development and Win API Programming in visual basic.
6. How to create report in Crystal Report and integrate with visual basic application.

Project Description

This project is made for one of the big decorator services in Mumbai, they supply decorating item to

film industry for movie shooting. Presently they issue their client handwritten invoice and they enter details in manual register. And maintain MS Excel file for product rate. They want computerization of their manual invoice and bill generation process.

Some important coding features you can get from this project.

1. How to convert MSFlexGrid as editable text box and drop down list box.
2. How to format MS-Excel worksheet with border color, back ground color, text color and change column width in visual basic.
3. Convert Rupees to amount in word like 123.50 will convert into "Rupees one hundred twenty three and fifty paise only"
4. How to connect and show crystal report from visual basic application.

Click here to [Download](#) the project documentation, source code, database and report files for eBilling Invoicing and Accounting System.

For any query and help regarding this project visit

http://www.programmer2programmer.net/forums/forum_main.aspx?forum_id=6

Click here to view the [online demo](#) of the eBilling application.

Please send me your college project report format and project guide line at [my email id](#) , so that I can prepare and list projects and project report as per your college/university standard.

All projects listed here can be used for bellow mentioned Indian university. Find the list of Universities.

- Alagappa University, Alagappa Nagar, Karaikud 623 003, Tamil Nadu.
- Aligarh Muslim University, Aligarh 202 002, Uttar Pradesh.
